DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 12/24/02. These drawings are acceptable.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 9-29 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 9 recites the limitation of an anesthetic controller comprising a model computing means for calculating an actual current value of a current active substance concentration in a patient's body on the basis of a patient model by utilizing former values of the active substance previously supplied. However, the specification fails to provide any information on how the model computing means calculates the actual current value, i.e., the applicant has failed to provide any formulas and/or algorithms that would enable the "model computing means". Therefore, one of skilled in the art would not know how to make and/or use the invention as recited.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 1 recites the limitation "the rate" in line 1. There is insufficient antecedent basis for this limitation in the claim. The applicant is suggested to use --a rate--.

7. Claim 1 recites the limitation "the current active substance concentration" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

8. Claim 1 recites the limitation "the present active substance concentration" in lines 11-12. There is insufficient antecedent basis for this limitation in the claim.

Response to Arguments

9. Applicant's arguments with respect to claims 9-29 have been considered but are moot in view of the new ground(s) of rejection.
